A Prognostication.

FOR the hearing, and determining of all Contracts, Discords, and such like matters in the Common-wealth, these 4. times commonly called the *Termes*, bee appoynted, in which the learned Iudges set an end of Contention, and Debate, betweene party and party.

Every of these 4. *Termes*, consists of 4, 5, or 8, *Returnes*, every *Return* of 4. dayes, & every day serving unto a several purpose.

Note then, that every *Terme* hath part, of all these 6. kind of *Returnes*, viz. *Crastino Octabis*, *Quindeno*, *Tres*, *Mense*, & *Quinq*; *Crastino*, is the morrow after the *Basis*, or day nominated; a *Crastino Trinitatis*, is the morrow after *Trinity* Sunday, it being the *Basis*, and day that gives the denomination, *Octabis* is 8. dayes after inclusively. *Quindeno* is 15 after. *Tres* that day 3. weekes. *Mense*, that day Moneth, and *Quinq*; that day five Weekes.

Now every of these *Returnes*, hath 4. severall dayes, whereon they consist: the first whereof hath a double signification, the one is the day of *Returne*, and the other the day of *Essoyne* for the Defendant, in a personall action, or the Tenant in a reall action, to be *Essoyned*. The second, is the day of *Exception*, for the Plaintiffe or demandant to lay an *Exception*, if no *Essoyne* be cast, that the Defendant shall not be *essoyned*, or amerced. The 3. is *Returna Brevium*, that is, the day whereon the Sheriff must returne the *Weit*; The 4th. is the day of Appearance for Parties, and Jurors in the Court of *Common Pleas*.

If any of these dayes fall upon an Holyday, that is no Court day, as in *Hilary Terme*, upon the day of the *Purification*: In *Easter Terme*, upon *Ascension* day: In *Trinity Terme*, upon the Nativity of *St. Iohn Baptist*. And in *Michaelmas Terme* upon the day of *All Saints*, or upon any Sunday (all which, be no Court dayes) then must the next day following serve for both: as if the *Essoyne* day fall upon Sunday, then Munday must serve for the *Essoyne* day, and the day of *Exception* both.

These dayes have all most use in the Court of *Comon Pleas*.

But *Laticlates*, or other *Proceses* upon a Bill certaine, it is upon a day certaine: As *Die lune proxime post Purif*: which must alwayes be reckoned from the *Essoyne* day. In

Wood-house. 1637.

In the Starre. Chamber, Chancerie, Court of Wards, and Court of Requests, they use none of these Returnes but onely the day of Appearance, which is *Quarto Die post*.

Yet note well, that if a *Capias*, *Exigent*, *Scire facias*, or a *Distingas* be executed after the day of Essoyne, by the Sheriffe or a Commission' sate upon out of any of the aforesaid Courts, after the sayd Essoyne day, it is neyther justifiable, nor warrantable.

The Law-dayes in the Courts of the *Arches*, *Audience*, *Prerogative*, *Consistory* in *Pauls*, *Delegates*, *Admirall* Court, and *Higb-Commission*, as they be usually kept in the Terme-time.

A Prognostication.

THe first day after every of the Feasts set downe for every Terme, the Court of the *Arches* is kept in the fore-noone in *Bow-Church*; And the *Admirall* Court the same day in *Southwarke*, in the after-noone.

The second day after every of the said Feasts, the *Audience* Court is kept, in the fore-noone in the Consistory in *St. Pauls*, and the *Prerogative* Court in the same place, in the afternoone. The third day following every of the said Feasts, the Bishop of *London*, his *Consistory* Court is holden in *St. Pauls* in the fore-noone, and his Majesties Court of *Delegates*, in the same place in the after-noone. The fourth day following the said Feasts, his Majesties Court of *High Commission*, is kept in the *Consistory* in *St. Pauls*, or (as of late yeares) at *Lambeth*, or in the Lord Bishops of *London* his Pallace, on Thursday after-noone. But if any of the dayes before recited be Sunday, or an Holy-day, then is such Court kept the day following.

In *Hilary* Terme, foure of the above-named Court dayes, be ordinarily kept, and as many in *Easter* and *Trinity* Termes: according to the course of the yeare, as the Iudge in the *Arches* in his discretion shall thinke good, who at the end of every Terme appoynteth the Court dayes to be kept in the next Terme, but in *Michaelmas* Terme, the Court dayes (if they be not altered) were wont certainly to be kept.

I therefore advise all Countrey-men (especially those that dwell farre off) being cited by any originall Proccesse to appeare in the *Arches*, *Audience*, *Prerogative*, or *Delegates*, to send to some Proctor, a note of the cause, and to what Court they be cyted, to appeare for them, and to returne them word of the very Day in which it shall be needfull for them to appeare in person.

But in the course of Practise in the *High Commission*, and the *Admirall* Court, it is otherwise, for every person cyted to those Courts, must appeare personally.

A Prognostication.

Generall Observations, and profitable to be regarded;

Remoue, and set young Trees, from October vntill February, setting alwayes that side towards the Sun, which was before, the wind Southerly, or at West, the weather warme, dry, and in the new of the Moone.

Graft, and plant trees, the Moone being new, in Taurus, Virgo, or Capricorne, in faire, dry weather, wind S. or West.

Cut Vines in December, or January.

Fell timber, to continue, and be without Wormes, in December, or January, 2, or 3, dayes before the Moone change.

If you will haue it grow againe, in the new Moone is best.

Cut Hedges, betwene the change and full Moone, from the end of Ianuary, vntill May.

Sheare Sheep, cut hayes, and sow all manner of Cozne in the new of the Moone.

Set and sow all kind of Seeds, the Moone in Aries, Taurus, Cancer, Virgo, Libra, Capricornus, Aquarius, or Pisces; but for Seeds whose roots be round, should be sown, or set 3, or 4, dayes before the full of the Moone or after.

Dung land that weeds may not abound, in the last quarter.

Seld or lib Cattell, the Moone in Aries Libra, or Sagittarius after full Moone: but you may let them bloud at any time, the Signe not being in the heart, nor in the place where the incision is made, nor in the day of the Moones change.

Gather Flowers, or Seeds, such as you mind to keep all the yeare at the full Moone. Dry your flowers in the shade till they be almost dry, and then Sun them a little, lest they mould, or corrupt. Doe the like with your seeds, for they will indure the beames of the Sun.

Gather Apples, and Wardens, in the last quarter of the Moone; lay euery sort by it selfe (without any fallings among them) vpon bare boards, or on a Plaster flooze, vntill the end of November, the thinner they lye the better, let the place be close shut in frosty weather, & extreme cold; then to couer them ouer with fine Hay, or Barly chaffe, will not be amiss: but Wardens so gathered, and layd on dry boards, need no couering.

Profitable Rules for Gardening.

In the Southerne parts, neare the Sea, Gardening may be more timely done, than Northward, and in the midst of Land, where the ayre is not so warme, and favourable.

2 In setting hearbes, leaue no top more than an handfull about the ground, nor more then a foot deepe in the earth.

3 Twine the rootes of those slips you set if they will abide it, but Gilliflowers are too tender.

4 Set moyst, and low dry.

5 Set slips at any time, except about Midsummer, or in frosts.

6 Seeding spoyle the most Rootes, by drawing the heart, and sap from them.

7 Gather for the Pot, and Medicines, hearbs tender and greene, the sap being in the top, but in Winter the Root is best.

8 All hearbes once in seauen yeares should be renewed except Rosemary.

9 These require whole plots. Artichokes, Cabbages, Turneps, Parseneps, Onions, Carrets, Saffron, and Sherrits.

10 Gather all your Seeds, dead, ripe, and dry.

11 Lay no dung to the rootes of your hearbes, for dung not rotted, is too hot, even for trees also.

12 Thin setting and sowing (so that the Rootes stand not about a foot distance) is profitable; for the hearbes will like the better, and greater hearbes require more distance.

13 Set, and sow hearbs in their time of growth (except about Midsummer, for then they are too tender) but trees in their time of rest.

14 A good Huswife may, and will gather store of hearbs for the pot about Lammas, and dry, and pound them which in Winter will doe her good service.

15 Weed your Garden with weeding knives of fingers, after a showre of raine, and let the Weeders learne to know hearbs and Trees, from weeds.

Generall Rules of Physicke.

CVt no Veyne nor let Blood, when the Signe is in the place where the incision is to be made, neither when the Sun or Moone are afflicted with the malignant Planets, *Saturne*, or *Mars*: let it be done in the morning, after the Sun-rising, and while the patient is fasting: If in the afternoone, then after perfect digestion, the ayre being temperate.

In letting of Blood, the Physitian, or Chyrurgion must be carefull of his patient, for many times the careless and vnclearned, by letting of blood, open a way to dangerous infirmities, & sometimes to present death. It is not convenient, that a leane or weake man or woman, or one that is very fat, or grosse, nor for a Child to be let blood. It is to be considered, how it standeth with the Patient inwardly for his Complexion, and Age, for the time of the yeare, and the day. Therefore it is best to let blood in a faire temperate and Sun-shine weather, not to sleepe presently after it nor to stirre violently.

The best times to let Blood be, for the Sanguine the Moone being in *Cancer*, or *Pisces*. For the Melancholicke, in *Libra*, or *Aquarius*; and for the Phlegmaicke, in *Aries*, or *Aquarius*.

For the Phrensie, and Pestilence, Squinancy, Plurisie, Apoplexie, continuall Head-ach, hot burning Feaver, or any other extreame paine, or dangerous disease, remedy must be sought with all convenient speed, but Blood not let in so great quantity.

It is best to Bathe, the Moone in *Aries*, *Leo*, or *Sagittarius* for health, but for cleanlinesse in *Libra* and *Pisces*.

Sweatings as they are of two sorts, that is Naturall, and Artificiall; so they be for 2. purposes. The Naturall sweat (good heed being taken in opening the pores) will dissolve grosse, & thicke humors, cleanse the Blood, comfort the Spirits, drive away cold, helpe Numnesse and the Dropfie. The Artificiall sweat, will cleanse Scabs, put away Itch, amend dulnesse in hearing, ease the Stone, dissolve congealed and cold Melancholy Blood, and humors. But for the better performing, take counsel of thy Physitian.

The best times to sweate in, are the Moone being in *Aries*, *Leo*, and *Sagittarius*.

Notes

Notes of Husbandry, with some other things to be considered, in every Moneth of the yeare.

Husbandry doth alter according to the Nature of Countries, for as the earth, the ayre, the little, or much heat, cold, or moisture doth increase, or diminish: so must good husbandmen change theyr seasons, labours & instruments. In the fruitfull Vales of this land, where is stiffe clay, and in all other places of the like nature, tillage must begin betime in the yeare, the Plowes, and other implements must be large, and strong, the labour great, and painefull; In moist & fruitfull, errable soyle would be begun at latter seasons, the Plowes, other necessaries, and labours are to be somewhat lesse then the other; In light Sandy grounds, that be fruitfull, theyr seasons be latest, theyr furniture and labour least. Lastly, in barren, and ynfertile fields the first season of the yeare is to be considered, for in all places (As thus fructificat non age) and the Plowes, and implements must ever be fitted to the nature of the ground.

January.

Now cut downe Timber, in the last quarter of the Moone. Bid fruit trees of superfluous branches, and uncover theyr roots, brench cattell; Kill and geld for rearing; Remove trees if the frost be not too hard, set or sow kernels, or berries; Set quicksets, Rose trees, Peaches, Filberds, and Plumtrees; Sow or set Pease, and Beanes; Fallow land; Trench gardens with dung; Remove Bees, and for your health keep your body warme; Let good, and wholesome beget be your Physitian, and rather with exercise, and labour, then sauce increase your appetite to meate.

February.

Set, or Sow all sorts of Pease, Beanes and other Pulses, Sow Mustard seed; Cast by ditches; Set, and plant, Vines, Hoppes, Goose berries, and any fruit that growes upon little bushes; Prune, and trim all sorts of fruit trees from Mould, Cankers, and all superfluous branches.

Gratt

A Prognostication.

Graft Wardens, and Peares at the end of this month; Sow Dates in cold, and stiff land; Take heed of cold, for beares mites that are slimy and flegmaticke, and if great need require, Purge, Bath, or bleed as the skilfull shall direct you, March.

In the new of the Moone (the winde South or West) graft, and make shend of sowing all manner of Puls, and begin to sow Dates, Barly, Onions, Parseneps, Carrets, Cucumbers, and all kind of Pothearbes, Slip Vertichokes and Sage; Geld Lambes; Let blood according to your youth, strength, and necessity, the Signe, and weather being fit; Whatsoever disease cannot in the Spring time be cured by Physicke, will hardly be rid all the yeare after.

April.

Sow Barly Hemp, and flax, Pole Hops; Set and sow all sorts of garden Herbes; Open Hives, and let Bees labour for their living; now the time beginneth to bark trees; Good housewives are busie about their dappies; Bleed, and purge, but by direction of the learned, and they that have Achies, or be troubled with the Gout, let them goe to the Baths in this or one of the next Moneths.

May.

Sow Barly betime (else looke for a late Harvest, and little profit) Hemp and flax, and all manner of fine herbes, and Seeds; Take Lambes from their dams; Leane topping of trees; Weed Gardens. Teach Hoppe to cline, but cut off the superfluous branches; Set Mills to worke; Gather May dew; Rise early, and walke in fragrant fields, and heare sweet running streames; Sage, and sweet new Butter is now an excellent breakfast; Clarified whey and sage: He are most soueraine drinks.

June.

Sheare Sheepe; Bring home sowell; Weed corne, and gardens; Set Rosemary, Carnations, & Gilliflowers; Sow Lettice, & Radish seed 3. or 4. dayes after the full, for then they will not run to seed; Set Saffron; Make hay, carry

Wood-house. 1637.

dry Sand, Lime, Marble, and manure of what kind soever
your land. Cut neither Hedge nor tree, in this, and the two
next months. Beware of great thirst; Use light and thin
pet, much exercise, and chaste thoughts.

July.

A July making, and getting in of Hay, pull Hempe that is
ripe. Gather garden Beanes; Get Rue, and Wormwood
to grow upon hoozes to drive away Moathes, and Fleas.
Fence your Coples, use moderate dyet, and beware of great
thirst, and taking cold suddenly. Beware of Physick. Bleed
not but upon violent occasions.

August.

A August bids you to follow your Cozne harvest. Gather
your garden seeds. Sow winter hearbes in the new of the
Moone; Sow Barly, and Dates; Gather Summer fruits
and for health refraine sleeping after meate, in the day time;
Shun feasts and banquets, and let Physick alone.

September.

In this, and the end of the last Month, gather Hops when
they wax browne, the weather being faire, and no dew on
the ground; Kill Bees; Make Vertuyce; Sow Wheat
and Rye; Remoue and set all slips of Flowers between the
two Lady dayes; Remoue trees, every new Moone from
September, untill February, especially in the new of the
Moone, the weather faire, and warme, the wind South or
West, Use Physick moderately; Forbeare fruits too plea-
sant or rotten, and (as death) shun roty and sursetting.

October.

Sow Wheat, and Rye, but chiefly in the beginning for
sease of raine in the end: Set and remoue young Trees
in the new of the Moone. Sow Acornes, and Nuts: Cut
Rose trees (if you desire to haue store of Roses) but once in
two yeares. Gather winter fruit, in the old of the Moone,
the weather dry, and after Moone. Get warme cloathing,
and goe dry-shod, and for health refuse not any Physicke,
from the hands of the learned.

[Novem-

A Prognostication.

November.

In the beginning of this Month, sow Wheat, and Rye, in hot ground. Cut downe Ashes for Plow timber; Make Malt. Kill Hogs. Trench gardens with dung. Set Crabtree Stocks. Use wholesome meates, and drinks, with good exercise to preserve health.

December.

In this and the next Month cut downe great timber in the old of the Moone, bushy hedges. Uncover roots of fruit Trees. Set Beanes, and Pease. Cover your best flowers and hearbes, from frosts, and Stormes, with rotten old horse dung. Look well to cattell. Let horses blood. Eat meate hot, and nourishing. Drink good Wine, and Strong drinke. Keepe thy body well clad, and thy house warme. Banish all cares from thy heart, and conclude the yeare with feasting thy poore neighbours reioycing together, that God about this time sent his onely begotten Son into the world.

Coniectures of weather by the Change, Full, and Quarters of the Moone.

Vhen the Moone doth either Change, be at Full, or enter into her first or last Quarter, in Aries, Leo, or Sagitarius, in Winter is commonly faire, but in Summer hot, especially in June, and Iuly.

If the Change, be at Full, or enter into the first or last Quarter, in Taurus, Virgo, or Capricornus, it is like to be cold, but in Summer temperate.

When the said times be, in Gemini, Libra, or Aquarius, then take for wind especially in the Spring or Autumne.

When the Moone be new, at the Full, or come to the first or last Quarter, in Cancer, Scorpio, or Pisces,

ces, in Winter sudge of moyst and rainy weather,
and sometimes of Snow, but in Summer, it will be
good and temperate weather, for the most part, yet
sometime it raineth, and then especially, when Vo-
nus is aspected with the ♀ one.
